

Civil Project Engineer (Kirkland, WA | Wenatchee, WA)

CPH has an immediate opening for a **CIVIL PROJECT ENGINEER**. The successful candidate will advance their own technical design skills while also overseeing deliverables and mentoring younger design staff on multidiscipline project teams. CPH offers a work environment and variety of projects that encourage you to develop your individual skills and to pursue your professional career goals at a pace that you choose and that you show you can be successful.

CPH's mission is to always provide a higher level of service to our clients and the community. We accomplish this by empowering individuals with the latest tools and technology, access and mentorship of senior leaders that are respected industry veterans, and the support of a collaborative multidiscipline team. The **CIVIL PROJECT ENGINEER** is a full-time position for a professional who desires to improve their technical skills and advance/gain project management experience, produce exceptional work, and make positive contributions to an established team of professionals by:

WHAT YOU BRING TO THE CPH TEAM

- 5+ years of professional experience as civil engineer in either private or public-sector
- BSCE and professional civil engineering certification (PE) in Washington, or the ability to obtain Washington state PE within six months of hire
- Confidence and experience in designing civil site and infrastructure improvements including roadway, grading, storm drainage, and water/sanitary sewer utility facilities
- Proficient use of AutoCad Civil 3D to design and draft construction documents
- Hydrologic and hydraulic modelling experience that includes WWHM, MGS Flood, HEC-HMS, TR-55/NRCS based software, HEC-RAS, SWMM, or others
- Strong written and oral communication skills with proficient use of current Microsoft Office software
- Consistent focus on clarity, accuracy, and completeness of work product
- Local agency design and permitting experience preferred, but not required
- Desire to contribute to and experience an energetic and enjoyable team environment

EXPECTATIONS AND OPPORTUNITIES FOR YOU

- Communicate, coordinate, and maintain strong relationships with Clients, subconsultants, and agency partners
- Perform design, technical analyses, and engineering calculations and prepare plans for grading, drainage, utility systems, and other related site improvements as part of a project team
- Coordinate, communicate, and provide direction to design engineers, drafting and administrative staff, and subconsultants for specific project tasks, deliverables, and deadlines
- Prepare technical reports, correspondence, and other communications for clients and agency regulators
- Meet and communicate with regulatory jurisdictions, and understand and identify regulatory requirements and design standards as they apply to a variety of projects
- Prepare and/or manage the preparation of land use entitlement and other agency permitting documents including exhibits, applications, and narratives
- Assist with marketing and business development including preparation of project scopes of works and fees
- Maintain and establish positive and long-term client relationships with a focus on a higher level of service

COMPENSATION (FULL TIME)

- Competitive hourly pay rate
- Paid overtime (1.5 x base hourly pay rate)
- Paid Personal Time Off (PTO) and Holidays
- Performance Bonus Profit Distributions
- Medical and dental benefits paid 100% for employee and portion of family
- Managed retirement account with employer matching contributions

CPH Consultants is an equal opportunity employer.
